

**UPDATE ON JERUSALEM**

Reference the "ALERT!" post on 8-21-16, what happened last fall (10-18-16) was the United Nations organization UNESCO executive board adopted a controversial resolution that mandates certain rules for the preservation of holy sites in Jerusalem. One of those mandates was that the Temple Mount can only be referred to by the Islamic name al-Haram al-Shariff. However, because this also includes the Western Wall where Israelis pray, this mandate effectively erases the Western Wall from Jewish history. This UNESCO action was followed up by the UN General Assembly voting on 11-30-16 to support six resolutions concerning Palestinian autonomy in their land disputes with Israel. The prophetic question is whether this verbal removal (on 10-18-16) of Israel from East Jerusalem is the actual event that starts the countdown? If so, then time is exceedingly short for everyone who calls themselves by the Lord's name to get as close to the Lord as possible in order to hear how He would guide each of us in the approaching hour.
